VENUE				
POSITION	QTY	COMMENT	PROPOSAL	OUR ANSWER
Venue				
Name of tech promoter				
Length				
Width				
Height				
Presence of balconies				
Dancefloor sizes				
Capacity				
FOH location				
Distance to first viewers				
STAGE (min 7x5)				
Depth				
Width				
Height				
Location in the venue				

The power supply of the sound system (foh & mon consoles, speaker system and backline) must be carried out by one separate power source, independent of the power supply of the lighting and video equipment. All equipment must be properly grounded.				
The back of the stage must be decorated with a soft black curtain. If there are any large spaces on the sides of the stage (backstage), they should also be covered with a dense black cloth. It is not allowed to use glass, mirrors, any sound-reflecting surfaces to design the backdrop and the side inner sides of the stage. In open areas, sidewalls and a back are required to protect the stage from rain or wind				
PA		D&B, L'Acoustics, Adamson, Coda audio		
POSITION	QTY	COMMENT	PROPOSAL	OUR ANSWER
There should no be acoustically non transparent structures in front and side of the pa system. No banners in the front of PA system				
Main L-R				
Sub				
Frontfill				
Outfill				
Center cluster				
Delay systems				
Amplifiers				
PA controller				
PA systems engineer Knyazev Ilya +7 (916) 311-11-91				
FOH				
POSITION	QTY	COMMENT	PROPOSAL	OUR ANSWER
Location of the FOH console only in the center of the hall, on the same floor as the dance floor				
FOH tent should not block the PA and the stage view, it is important to be at the same height as the audience				

The back and side walls of the FOH tent must be acoustically transparent or be able to be dismantled				
We need ufo or other heaters in the cold season				
Bar stool with back, rubber mat 1x1m	1			
Electric drop 220V euro schuko connected to the UPS	8			
Active shout speaker	1
